Visa Status: Residence Visa · Availability: Immediate Joiner

Python Full Stack Developer with 5+ years of experience building scalable backend and web applications across UI, middleware, API, integration and database layers. Strong in Python, Django, FastAPI, REST APIs, microservices, asyncio, SQL data modelling and enterprise integrations. Hands-on real-time experience with Microsoft Azure, including Azure App Services and Azure Blob Storage, along with Azure DevOps, GitHub Actions, Docker and Git-based CI/CD. Experienced in API, integration, unit and microservices testing, AI/LLM application development, and ITIL-based production support.

PROFESSIONAL EXPERIENCE

NTT DATA — Python FullStack Developer

Dec 2024 – Mar 2026 | Bangalore, India

- Developed and maintained Python backend systems using OOP, exception handling and validation on a microservices architecture, delivering event-driven automation for large-scale infrastructure management.
- Designed and implemented **10+ RESTful APIs** secured with OAuth, JWT, integrating enterprise platforms (**ServiceNow, AI Desk**) for seamless **API & integration** across systems.
- Built event-driven services with **Django, FastAPI and asyncio**, validating payloads with Pydantic to improve microservices scalability, maintainability and high availability.
- Provided production support using the ITIL framework; troubleshooting and optimized API routes, database queries and Docker-based services across local/on-premise and Azure App Services environments, improving operational efficiency by 40%.
- Performed unit, integration and API testing to identify defects and validate request/response contracts across microservices, with structured logging and root-cause analysis.
- Worked with Azure DevOps for source control, work-item tracking and CI/CD activities, alongside GitHub Actions, Docker and Docker Compose; managed branching, pull requests and production releases. Used Microsoft Azure services including Azure App Services and Azure Blob Storage in real-time enterprise environments.

Capgemini — Software Developer

Jun 2022 – Sep 2024 | Bangalore, India

- Developed full stack web applications with **Python, Django and FastAPI** — routing, templating, database integration and Pydantic validation — for secure, high-scale enterprise solutions.
- Designed and maintained scalable **RESTful APIs and microservices** using Flask and Pyramid, applying authentication, authorization, encryption and API best practices.
- Built Python automation applications and web frameworks with clean, enterprise-standard code and robust exception handling.
- Used **SQLAlchemy and Django ORM** across **MySQL and PostgreSQL** for data modelling, **CRUD** operations, transaction management and schema design, with **ETL** pipelines optimising retrieval for large datasets.
- Automated deployment and delivery workflows with Git, GitHub Actions, PowerShell and Linux scripting, performed code reviews, debugging, unit and integration testing.
- Delivered features across the complete **SDLC** with clear documentation, coding standards and backend performance optimisation for high-availability production systems.

Inventeron Technologies — Software Engineer

August 2020 – May 2022 | Bangalore, India

- Developed Java Spring Boot backend applications with RESTful APIs and **microservices**-based integrations for enterprise clients.
- Built database interaction layers with query optimisation, reducing **API response times by 20%**.
- Gained hands-on experience across the full SDLC, Agile methodologies and Git version control.

TECHNICAL SKILLS

- **Core Python:** OOP, exception handling, file handling, modules, asyncio, concurrent programming, SQL, PowerShell, YAML
- **Full Stack & Frameworks:** Django, FastAPI, Pyramid, React (recent project), Pydantic, REST APIs, routing, templating, DB integration, authentication, UI/middleware/database layers
- **Backend & Integration:** Microservices architecture, API & enterprise integration, MCP (Model Context Protocol) working knowledge, distributed systems, data modelling, systems design, ServiceNow integration
- **Databases & ORMs:** Django ORM, MySQL, PostgreSQL, CRUD, database design & optimization
- **Data, ETL & AI/ML:** Pandas, NumPy, ETL pipelines, LLMs (Google Gemini), prompt engineering, CI/CD & DevOps: Azure DevOps, GitHub Actions, Git, Docker, Docker Compose, Linux, PowerShell, Microsoft Azure (Azure App Services, Azure Blob Storage), code management
- **Automation & Security:** StackStorm, ServiceNow integration, OAuth, JWT, authentication, authorization, encryption
- **Testing:** Unit, integration, API, microservices testing, structured logging, debugging and root-cause analysis
- **Methodologies:** Agile, SDLC, ITIL production support, Git workflows, documentation, coding standards, stakeholder communication

PROJECTS

Readr_LLM – AI-Powered Document Intelligence Application

- Built and deployed an AI-powered document intelligence web app using Google Gemini for document summaries, document Q&A, key-information extraction and resume ATS scoring.
- Applied prompt engineering and API integration to serve real-time LLM insights through a web application; recent project work also included React-based UI development.

CERTIFICATIONS

- Prompt Literacy Certificate – DCAI
- Generative AI for Developers – Google/GeeksforGeeks
- Azure Cloud / DevOps Experience – Microsoft Azure (Azure App Services, Azure Blob Storage) and Azure DevOps (real-time enterprise experience)
- AWS Cloud Practitioner Certificate – Amazon Web Services
- Generative AI – Coursera
- ITIL4 – Axelos

EDUCATION

Bachelor of Computer Science and Engineering

Vishweshwaraiah University | 2016 – 2020
